

Assignment -4

Docker and Kubernetes

Assignment Date	21 October 2022
Student Name	TAMILARASAN V
Student Roll Number	611819205011
Maximum Marks	2 Marks

1. Pull an image from docker hub and run it in docker Playground

The screenshot displays two browser windows. The top window shows the Docker Hub page for the repository `uifd/ui-for-docker`. It indicates that the repository is deprecated and suggests using `portainer/portainer` instead. The page shows the repository was updated 6 years ago and has over 10M pulls. A 'Docker Pull Command' box displays the command: `docker pull uifd/ui-for-docker`.

The bottom window shows the Docker Playground interface. It displays the instance ID `cd9an2u3_cd9av060qau0008hbjs0` and the IP address `192.168.0.13`. The 'SSH' section shows the command: `ssh ip172-18-0-4-cd9an2u3tccg00fg6k0@direct.labs.play-with-docker.com`. The terminal output shows the process of pulling the `uifd/ui-for-docker` image from Docker Hub and running it with the command: `docker run -d -p 9000:9000 --privileged -v /var/run/docker.sock:/var/run/docker.sock uifd/ui-for-docker`.
